

HONEYMOON FROM HELL

A survival series

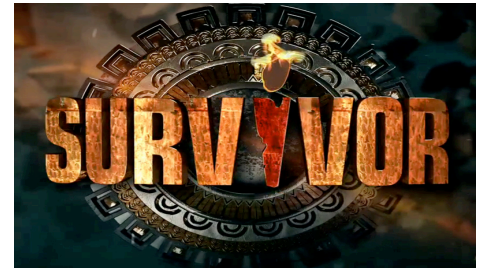

CONCEPT

Meets

With
elements of

A young couple has the wedding of their dreams, but as soon as they walk out the door, they are instantly transported to a remote location with little food, water or resources, where they must survive for a week. There, they will go through intense challenges and have to survive under extreme conditions. By the end, they will either have a bond to last a lifetime... Or they're getting divorced.

THE WEDDING

It's the best day of your life.

Every moment has led up to this. The day that you finally get to tie the knot with your soul mate. You couldn't be happier...

All of your closest friends are there.

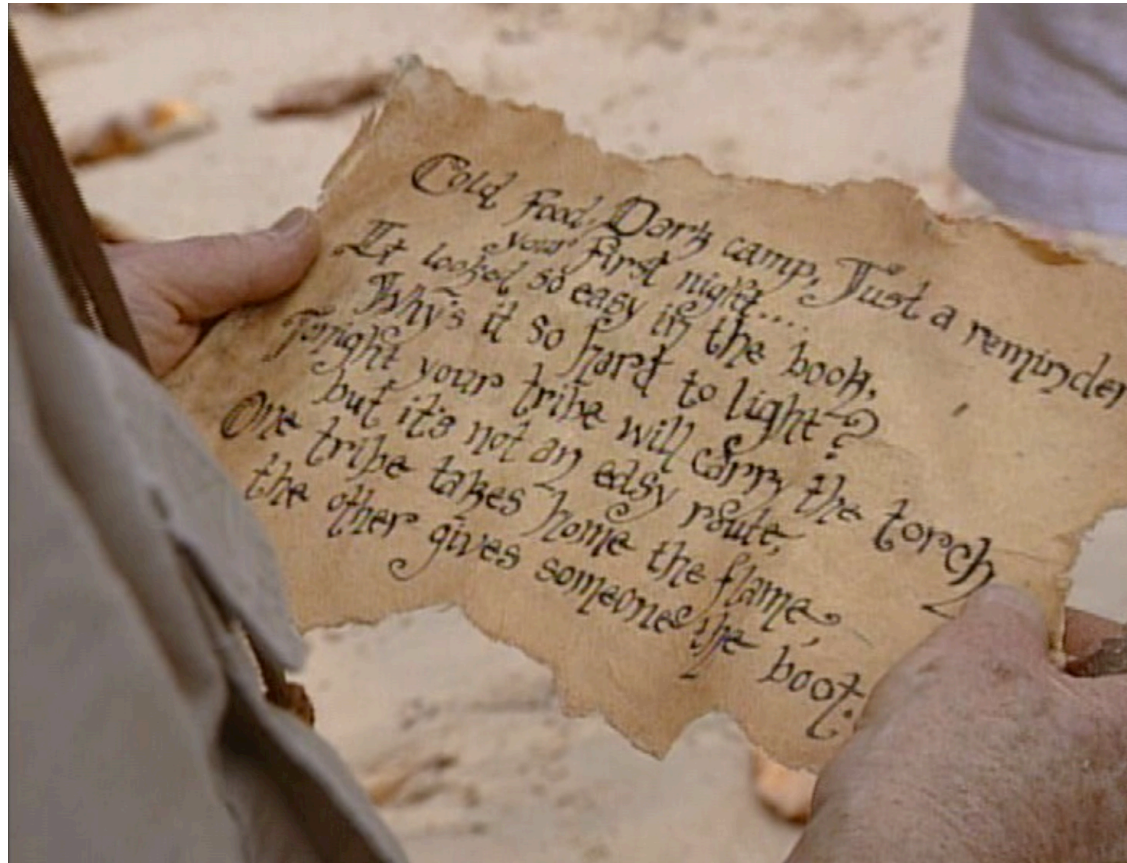

Your parents are bursting with pride.

BUT NOW... YOU HAVE ENTERED THE HONEYMOON FROM HELL

On day 1, our young couple is brought directly from their wedding into an extreme environment. It could be a jungle, wilderness, or a deserted tropical island. They arrive with nothing but the wedding clothes on their backs.

At the drop off spot, they find their first mission. For a fresh set of clothes, a bottle of water, a book of matches, etc. they will have to perform a grueling task. Already hungry, thirsty and tired, they need to pull together as a team to get the much-needed supplies.

Challenges will require calm under pressure, resourcefulness, teamwork, perseverance and survival skills.

Sometimes, they will rise to the occasion and discover what they're truly capable of as a couple who intends to spend the rest of their lives together.

Other times, they will fail, argue, fight, and start blaming each other – as most couples do.

***Honeymoon from Hell* is a survival show, not only to see if a newlywed couple can survive the elements, but also if they they can survive each other. The producers will engineer the honeymoon so that our young couple is always on edge, providing just enough comfort to keep them going, but raining down hell if things are going too well.**

The couple will have to come together to overcome all the obstacles thrown at them. They will see firsthand just how strong their spouse is, how resilient they can be, and how they respond during times of crisis. The bond of their relationship will be tested like never before.

If they let the elements pull them apart, things can go downhill quickly.

HONEYMOON FROM HELL

They survived the wedding, but can they survive the Honeymoon from Hell?
